5.5 HP* Big Bore Gas Air Compressor

CATALOG (SKU) NUMBER: MK-MAC5501G

Powerful Honda GX160 4-stroke engine for increased performance and superior reliability. 10-gallon twin tanks provide air supply to multiple nailers. Cast iron pump with Big Bore cylinder and piston is engineered to provide durability and faster recovery time for improved performance. Industrial-grade recoil starter with ergonomic grip and recoil rope design for faster, easier starts. Automatic idle control engineered to reduce gas consumption and service life. 10” non-flat tire for easier job site portability. Pump is oil-lubricated for cooler running temperatures and reduced wear. Large automotive style industrial air filters for increased air intake and greater efficiency. Convenient oil drain valve at the front of the pump for easier access. Integrated control panel with oversized pressure gauges for easier visibility of tank and hose pressure. Lever-handle ball valve tank drain improves upon standard petcock design for easier maintenance and air tank release. Anti-vibration rubberized feet for less vibration and reduced “crawling” during use. Fully enclosed belt drive with large fly-wheel for more efficient cooling of the pump. Stainless steel braided discharge hose for increased corrosion resistance and durability. Low profile design for easier transport and storage. Oil sight glass for fast, easy and efficient maintenance. Two universal brass couplers for increased durability and reduced corrosion. Ideal for framers, roofers, siding installation, decking, fencing, farming, general contractors, rental industry and more. *Maximum horsepower.
