7-1/4" Magnesium Hypoid Saw

CATALOG (SKU) NUMBER: MK-5377MG

Magnesium components create a lightweight saw (13.2 lbs.) that is well balanced and job site tough. Oil bath technology is created with a built-in fan and sealed gear housing to ensure 100% oil surface coating for less maintenance. Large cutting capacity (2-3/8" at 90°) with positive stops at 22.5°and 45°. High quality, heat treated hypoid steel gears are engineered for less maintenance. Powerful 15 AMP motor delivers 4,500 RPM with compressed winding technology to keep the overall size more compact yet deliver job site durability. Better fit with comfortable rubber grip on handle. Retractable hook allows tool to remain close by, but never in the way. Make quick, one-handed adjustments using large, rubberized levers. Settings are easy to read with oversized number and ruler markings. Blade wrench is attached to saw for fast and convenient blade changing. Reinforced 10 ft. power cord withstands jobsite abuse and lowers repair costs. Includes a premium 7-1/4" carbide tipped framing blade that cuts 50% faster and lasts 2x longer.
