Fuel Transfer Pumps

CATALOG (SKU) NUMBER: GPI

Founded in 1968 and privately-held, Great Plains Industries, Inc. is respected globally for its high quality fuel transfer pumps, fuel meters, flowmeters and Industrial instrumentation for fluid transfer pump and liquid flowmeter markets around the world. The Company is home to the GPI®, FLOMEC® and GPRO brands that serve Industrial, Commercial and Retail customers in many applications: fuel, agriculture, chemicals, manufacturing, construction, mining, oil and gas, and many more. Great Plains Industries' products are manufactured in the U.S.A. by more than 200 employees. In 2013 the Company acquired Trimec Industries of Sydney, Australia. Trimec is a leading Australian manufacturer of positive displacement oval gear, insertion and impeller flow meters, ancillary flow hardware and dedicated electronic flow instrumentation with markets in Asia and Europe. Trimec is now named Great Plains Industries Australia. Both Great Plains Industries and Great Plains Industries Australia are known for superior engineering and durability in its products along with strong customer relationships that reflect the Companies' family-owned heritage, strong work ethics and "Midwestern" and "Down Under" values. Great Plains Industries is headquartered in Wichita, Kan., with locations in Sydney and Mexico City.
