Nail Pullers

CATALOG (SKU) NUMBER: VB-NP

A cat's paw (also sometimes called a cat's claw) is a standard carpenter's tool, consisting of a round or hexagonal bar that curves at one end to form a pointed, cup-shaped tip with a V-shaped cleft for gripping nailheads. Popular retail outlets currently call these a claw bar if it has a claw on each end, or a moulding bar if it has a claw on one end and a flat pry bar on the other. It essentially works as a small crowbar.
