Power Strips

CATALOG (SKU) NUMBER: EL-02

power strip (also known as an extension block, power board, power bar, plug board, trailing gang, trailing socket, trailer lead and by many other variations) is a block of electrical sockets that attaches to the end of a flexible cable (typically with a mains plug on the other end), allowing multiple electrical devices to be powered from a single electrical socket. Power strips are often used when many electrical devices are in proximity, such as for audio, video, computer systems, appliances, power tools, and lighting.
