Rebar Chain Assembly

CATALOG (SKU) NUMBER: GF-01600

The Guardian Fall Protection Rebar Positioning Device is perfect for Work Positioning applications on rebar structures. Its double legs allow workers to lean away from walls, while keeping their hands free to perform any necessary work. To function correctly, it must be used in combination with a full-body harness with side positioning D-rings, so that both snap hook components can be properly attached. All chain assemblies are adjustable, and a variety of connector options are available.
